Understanding Your Listing Application Status

- If the Exchange defers an application, the issuer has 60 days to address the issues that caused the deferral and to provide any additional information requested.
 - If the issues are not addressed within 60 days, the Exchange may decline the application.
- If an application is conditionally approved the issuer has 90 days to file the final documentation
 - An issuer that has been conditionally approved for listing on the ISM may place the following statement on the front page of its final prospectus or listing document:

"The Barbados Stock Exchange International Securities Market has conditionally approved the listing of these securities. Listing is subject to the applicant fulfilling all of the Exchange's requirements on or before [insert date]."

Our Commitment to You

The BSE will use its best efforts to review the application in a timely manner. We aim to provide initial comments on a primary ISM listing within the following timeframes:

Listing Application Procedure (cont.)

Procedure for Secondary ISM Listing

Applicants for a secondary listing should follow the same procedures outlined for a primary listing, but may benefit from a streamlined listing process:

- As set out in the listing rules ([Rule 4520](#)), the listing document may be a public document issued by the issuer and approved by its recognized securities exchange or recognized securities regulator within the past year, if the document is wrapped with an update that discloses all material changes and new information since the date of the original document.
- The update must also include any disclosure that is required by the Exchange for a secondary listing but that is not included in the other jurisdiction's document.
- Applicants benefit from a shorter application review process by the Exchange because of the reliance on previously approved disclosure documents and the regulation provided by the recognized securities exchange and recognized securities regulator.

Applicants for a secondary listing must provide details for the proposed recognized securities exchange and recognized securities regulator that will be the primary regulators of the applicant and the securities to be listed.
